

PALACE

oi

e

THE MOST HIGH AND

Mightie Prince,

FAMES,

By the grace of GoD;

King of great Brittayne,

France and Ireland,

Defender of the

Faith, &c.

fpell of Christ Iefus (which is our light, our com-

oode of our foules) being for ealoufly embraced, so religi-

A 2

OUTV

oully professed, and so mightily defended by your most excellent Maiestie, hath induced many of your Highnesse Subicas (which formerly fate in darknesse, and in the shaddow of death,) to make diligent fearch into the holy Scriptures, and to hunger and thirst after the Kingdome of heaven and the righteousnesse thereof; to esteeme all things vile, so they may winne Christ, and that immortall weight of glorie, which is prepared for the Elect children and Saints of God: of this kinde, somehauing a religious desire, to worke their saluation with feare and trembling; being taught that the Law of God giueth light and understanding to the simple, that his Word is a Lanterne to their feete and a light vnto their pathes, find by reason

reason of their ignorance, and for that they were not brought vp in the facultie of reading, themselues deprined of many vnspeakable comforts, proceeding from ferious meditation in the Law of God; I was many yeares pak infantly importuned by divers religiously affected, to invent some speedie method, whereby with small losse of time, these obstacles might bee removed, and their godly defires fatisfied. To this end (most dread Soueraigne) I thought it necessarie to collect all English words into one small Treatise, that having learned onely this Booke with vnderstanding, they might proceede to the reading either of the holy Scriptures, or of any other Booke, with much facilitie, for that all bookes doe confift

fift of words. In that I have forted them Alphabetically, it ferueth to divers good vies, and truely the dependance which one word hath of another, draweth on the Learner with delight, and confirmeth the memorie; and in that they are only words, and not continued sentences, it enforceth the learner to rely wholly vpon the found of the Letters. Now, finding by long and approved experience this order & Treatile to performe my expectation and premised intendment, I have for the more profitable and publike vie of the same, inuented and annexed, briefe and compendious Tables, contayning the vse and practise of Arithmetike, with divers other things both necessarie & needfull to be knowne.

And

And having finished this Treatife, tending very much to the generall good of your Highnesse Subiects, I doe in most humble wise (prostrate at your Highnesse foote-stoole) present the same to your most excellent Maiestie, beseeching your gracious clemency to pardon my presumption herein. The Lord of heaven and earth bleffe your Maiestie with much happinesse and felicity here on earth, and crowne you with eternall happinesse in the highest heauens.

> Tour Highnesse most loyall Subject and bumble servant,

> > IOHN EVANS.

ad babling ground ba A 198 Trensife tending very much to stor to boos if notice sin Miganeffe but lett, It dep in an estilipse) old was defined flore Colors Hout Shoutell wood tions in the same of the land excellenc A samue of the lackering your stacious clemency to parconstitution of the second happinelle and michty bus on carth, and crowne vou with . with daligning 1.2200 band's forests

The promise, and performance of this TREATISE.

1. To spell and reade every word distinctly, and confequently, every English booke.

2. To write enery word plainly, orthographically, and truly.

3. To answere any ordinarie Arithmeticall question without the vse either of Pen or Counters.

4. To frame all bonds obtigatorie with indgement, certainety, and reason, although they neuer learne any one Latine word, more then is contayned in this Booke.

A 5 Thefe

These qualities (by this Booke alone) are easily obtayned by the ingenious and capable in one moneth: And with much ease and expedition, of all others that are of more tender sunderstanding.

4. To frame at bord other

rne any one Lating word,

e chen is comment in this

y, and reason, a chough sugar

fequently, energ Beeriffel soles.

word difficulty when

Tompetermery word pension

Conforants, b.c.d f.

All the

letters are
either

Dipthongs, ail ea.

A vowell is a letter, which maketh a full & perfect found of him felfe, as, a, man, I, am.

. Note, that E in the call of

A confonant is a letter which must needes bee sounded with a vowell, as ba, ca, da, fa, &c.

A Dipthonge is the found of two vowells in one fillable, as in this word, faid, die wolled than

ve your fillable with that yow.

1. Note, that there can be no fillable without a vowell.

2. Note, that you must diuide every word into so many sillables as there bee vowells in it, as, sa-lu-ta-ti-on.

beginneth a word, and a single consonant followeth, you must spell that vowell alone, as, Adam, a-bide.

4. Note,

4. Note, that when you find a vowell, and two or more confonants following, you must involve that vowell and the first confonant together, as in absent, absolution.

5. Note, that E in the end of a word, serueth onely to cause that word to bee pronounced long: as in blame, name, pate,

hate, basel a st than olmoo .

Confonants. 99 minm

1. Note, that when a Confonant beginneth a word, and after the vowell a fingle confonant followeth, you must make vp your sillable with that vowell, as in generation, re-commen-dation.

2. So that a confonant placed, betwixt two vowels, is joyned in spelling to the latter, as in,

ge-ne-ro-li-tie.

3. But if a vowell be placed betwixt two confonants, you must take one of the confonants to the first sill ble, and the rest left for the latter sillable, as in, constitution, configuration, con-

they are vowels, yet comming before any vowell, are changed incommon consonants, as in Iesus, Ieru-lalem, va-nitie.

5. Note, that x is alwayes ioyand to the precedent vowell, as in these, ex-tremitie, ex-ercise.

6. Note, that c before e or i, sounded like f, as in ceremonie, ir-cumstance.

7. Note, that ph beareth the found of f, and pf of f, as in these, Pharisie, Philemon, Psalmes, Psalmes,

8. Note, that ti before an o, belleth si, as in contention.

o. Note, that ch, sh, sl, st, are compound consonants, and must neuer be sundered, as in these, inchantment, cherishing, shamefast-nesse, shifting, slander, standard.

Dipthongs, ai. ea. ee. ei. oo.

1. Note, that where you finde any of these Dipthongs, you must not the fillable shall more inclined the fillable shall more inclined the first vowell than to the latter as in these words, Maide, brain faile, heaven, earth, great, health feede, neede, bleede; either, no ther; good, goodnesse, stood, foote, sood, goodnesse, stood, goodnesse, goodne

These Rules being well taught and conceived of the Learner, with bring much profit and delight; so that the difficultie of reading this ly consistent in the ill forting their sillables, which by these rule they may easily avoid: but for much as all things are better with derstood by example than precept I have collected all English word into this Volume and parted them into sillables for the case and help of the Learner.

FINIS.

The practice of Arithmetike in the vse of these

温度

He Rule of Three is the most excellent, the most profitable, and the chiefest Rule of all the rules of Arithmeticke; for

the which cause it is named the golden Rule, and the Rule of Proportion: yet neuerthelesse, as it is most excellent, so also most difficult, requiring the exact knowledge and practice, both of Multiplication and Divisionance and excellent, see a second practice, both of Multiplication and Divisionance and excellent, see a second excellent.

of the skilfull, and for the ease and helpe

helpe of the ignorant, I have framed these Tables sollowing, which will conveniently serve all Nations and People of the world, in supputating all sorts of Account with much ease and exactnesse, without any labour or vie either of Pen or Counters.

1. Observe then that every Page is charactered with the value of his number, orderly from 2. to a 1000 purposely omitting 1. for that it doth

neither multiply nor divide.

ments, either of Silkes, Wools, Cloathes, Yron, Oile, &c. that you looke for the value of one yard, elle, &c. pound, ounce, or drach. in the Page charactered at the top with the figure of that number.

3. Observe to looke for the number of yards, elles, &c. pounds, ounces or drachmes, &c. in the first columne of the same page, where you

may find in order any number from

1. to a 100. and having found the
number defired, in a right line on the
left hand there is the value and folu-

tion of the question.

Tables are not composed for the vse. of Englishmen alone, but serve generally all Nations of the world, and resolute them in their severall languages: so they are not bound to any one particular denomination: but doe change according to the denomination on of the question, so that every signific either a million, a thousand, a bundred, &c. of yards, elles, &c. pounds, nobles, crownes, shillings, pence, &c. perches, roodes, &c. or any other quantitie, qualitie, or value,

These sew observations well noted, doe plainly declare the practice, vse, and benefit of these Tables sollowing; but for as the most

G

apparant and manifelt things, are hard and difficult vnto the ignorant; I will insert these examples following

One hath bought twelve yards of Kersey at 4s. the yard; to know the totall summe turne to page 4, and in a right line from 12 you shall finde 48s. the value of 12 yards.

A Merchant bought Damaske 30 yards at 12s. the yard, turne to page 12, and in a right line from 30 you shall find 360s. the value of so many yards. -

Item, Veluet 18 yards at foure crownes the yard, open your booke page 4, and against 18 you finde 72 crownes. goldon , abnung

Moreover, bought broad cloth 31 yards at foure nobles the yard, turn to page 4, and against 32 you shall find 128 nobles, the whole value of fo many yards.

The like is to be done by all things fold by the yard, elle, &c. eitherat

pence,

pence, shillings, crownes or pounds.

A Merchant hath sold 38 barrells of powder at 61, the barrell, open the booke page 6, and against 38 you shall finde the whole summe to be received, viz. 2281.

An yron-monger hath fold, yron 50 tunne, at 13l. the tunne, turne to page 13, and against 50 you shall finde 650l. the whole summe to bee received.

The like is to be done by all things fold by weight, as drachmes, ounces, pounds, hundreds, &c. either at shillings, &c.

Now for mixed numbers observe, and note these examples.

A man buyeth eight peeces of Tapistrie at 51.25. 1d. a peece, turne to page 8, and from 5 in a right line you shall finde 40, from 2 16, and from 1 you find 8, so the summe is 401. 165. 8 J. Againe,

G 2

An

Another fold cloth, foure peeces at 121. 45. 2d. the piece; now have recourse to page 4. and you shall see for 12. in a right line 481. for 45. you finde 165. and for 2d. you finde 8d. so that the value of the foure pieces amounteth vnto 481. 165. 8d.

Veluet 18. peeces at 181. 45. 3d. the peece; open your booke in the 12 page, and in a right line from 18. you shall find 324. from 4, you shall have 72, and from 3 you shall find 54 so the whole value of so many peeces at this rate, appeareth to be 3241. 725. 54d. which by reduction is 327h 145. 6d.

Now, forasmuch as divers questions are of divers and different denominations, it is expedient to shew how to reduce them from one kinde

to another.

Note then that in Reduction of pence into shillings, you must alwayes looke in the 12 page of your booke,

booke, and to bring shillings into pounds, in the 20 page; and against your number in the first columne you shall have at all times your proposed number: Example, in the 12 page I looke for 552 pence, which being sound in the first columne, against that summe I find 46s. the totall summe of so many pence: and againe, for shillings turne to the 20 page, and you shall find 380 shillings and vpon the left hand 19l. your desire, and for 880, you shall have 45l. and in like manner proceede with any other summe.

But here note, that in this kind of operation, oft times you cannot find your exact proposed summe, then must you take the nearest vnto it in this order, 588 pence is not to bee found in the 12 page, and the nearest number is 564, which I find, and in the first columne against it 47 shillings; so I conclude, that in 568

G 3

pence,

pence, there is contayned 47s. and

Likewise for shillings in the 20 page, looke for 825, the nearest number in value to be found is 820, which as appeareth maketh 42 pounds; now the first proposed number being more by five, I conclude that in 825 shillings are cotained 42 pounds

and five shillings.

By observing this order and method, together with your owneingenious apprehension in sinding the right page, you may easily reduces ny thing to what denomination you please, as money into pounds, shillings, pence, halfe pence or mites: so likewise weights and lengths into pounds, ounces, drachmes, &c. elles, yards, seete, inches, &c. noting alwayes either in multiplying or dividing of any summe, that in the first columne of every page, the quotient of that summe appeareth, and the

prc-

thefe Tables.

producting right line vpon the right hand.

Now for questions of practice, take these examples.

Three Merchants having aduentured together 300l. and gayning 84l. to find each one his right share, turne to page 3, and against 84 you shall find 28l. and so much is every

mans part of gayne.

Foure Merchants have adventured 800l. the first man layed in a 100l.
the second man 180l. the third man
layed in 200l. and the fourth man
320l. they have gayned 200l. to diuide this gaynearight, have recourse
to the 4 page, and looke for every
mans adventure vpon the right hand,
and the number in the first columne
will performe your request; so it will
appeare, that the first mans adventure, being a 100l. deserveth of gaine
25l. The second man for 180l. hath

G 4 451.

451. the third man for 2001. adnerture, must have 501. and the last for his 3201.must have 801. which summes added together doe amount to the totall summe gayned.

Twelve Souldiers having obtayned a prize worth 840l. turne to page 12, and against 840 you shall finde 70l. and so much is every mans share.

Moreover, suppose the meaneor middle motion of Luna to bee 12 degrees, how much in proportion doth answere to each houre, tune to page 60, and from 12 you have in a right line 720 minutes contaynedin 12 degrees; now turne to page 24, and in a right line from 720 in the first columne you see 30 minutes, and fo much is the bourely motion of Luna: and thus may you find in degrees, minutes, seconds, thirds, &c. the motion, and declination of any planet, both in longitude and latitude for any time given. To To know how many houres is contayned in a 100 dayes, open your booke in page 24, and from a 100 you shall find by a right line 2400, and so many houres bee in a 100 dayes.

For measuring of land, suppose you have a field, contaying in length 80 Acres, and in bredth 60 turne to page 80, and from 60 in a right line, you shall find 3600, and so many Acres are contayined in that field.

The like order is to be observed in measuring all sorts of Architectures, walls, &c. or glasse, stone, or timber, &c. and vessells of all sorts, &c.

Now if any either more ingenious or curious, have a desire to enlarge these Tables for their private pleasure and delight, let them repaire to what page they please, and by multiplying the number of the page, by the num-

0

G 5

bers

bers contayned in the first columne of the same writing, the producting right line towards the right hand; they shall not only enlarge them, v/q, ad infinit. but also with certainty and indgement, correct and controll any fault escaped either in writing or printing.

Thus have I briefely demonstrated the vse and practice of these compendious Tables, to the industrious and carefull student, both plaine and perspicuous: But to others of more grosser vnderstanding, a large volume would scarcely exemplifie the manifold and excellent vses of this admi-

rable invention.

And to conclude, I doe affirme (confidently and experimentally) that these Tables will effectually performe and accomplish any Arithmetical operation, either in the Mathematical sciences, Merchandize,

these Tables.

or in any other facultie, wherein exact calculation is required: so that with aduised discretion they looke for the solution of each question in his proper page.

The Parkle on in any or her facultie, wherein exed balantion is required: forthat edeci yadı enlaşalılı balıdı adıyı for the Grand or of each quedepose thou in its proper

C. D.

E. F.

A Bill Obligatorie for the repayment of Money lent.

BE it knowne ento all men by these presents, That I Edmond Iones of Sedgley in the Countie of Staff. You. man, doe owe vnto Emanuell Harrison of the same Towne and Countie, Gentleman, one hundred pounds of good and lawfull money of England, to bee payd vnto the faide Emanuell Harrison, his heires, executors, or administrators, vpon the Feaft of Easter day next comming after the date hereof; for which payment well and truely to be made, I binde mee and mine heires firmely by these prosents. In witnesse whereof I have put hereunto both my Hand and Seale. Deted the first day of lanuarie, &c. Inthe yeares of the Reigne of our Souersign Lord King Iames, of England, France and Ireland the 18. and of Scotland the four and fiftie. mthe preferre of

A generall Acquittance.

BE it knowne ento all men by these presents, that I Adam Harrison, have remised and released ento Iames Pemberton of Kingstone in the Countie of Salop Yeoman, all manner of actions, suites, debts, accounts, and all manner of Iudgements, executions, and demands, which I the same Adam Harrison, may, might, or ought to have against the sayde Iames Pemberton, his heires or executors, or any matter or cause whatsoever from the beginning of the World ento the day of the date of these presents, &c. In witnesse, &c.

All Bonds Obligatorie differ from these Presidents in respect of the name, place, title, Countie, summe of money, and date, both for the day of the Moneth, and the yeares of his Highnesse reigne.

andrew in this facult

All which differences are to bee varied according to the Figures and premised

directions.

The

The greatest difficultie consistesh in the right ordering the yeres of his Highnesse raigne, which alwaies begin for England, &c. the 25. of March, and of Scotland the 25. of Iuly.

21 Sof England Decimo none, of Scotl. Quinquagessimo quant.

22 Sof England Vicessimo
20 Scott. Quinquagessimo quinti,

23 Sof England Vicessimo prim. Sof Scotl. Quinquagessimo sexto.

These directions well conceived, and by demonstration made plaine, will bring the most ignorant to a sufficient vnderstanding, in this facultie.

All Bonds Obligatorie differ from

been les Courries famine of money, Aldere, both for the day of the Mo-

cording to the Figures and premiled

HIS MOST KINDE, AND

MVCH INDEARED

FRIEND,

M' Francis Woodhouse.

Treatife, tending werie much to the generall good and wtilitie of the Common-wealth: Being many waies obliged to your approved kindnesse, to avoid that hatefull Title of Ingratitude, I doe present this poore Mite, as an earnest of my best affection, and a publique testimonie of my thankfull acknowledgement, herewithall wishing wnto you and yours, all prosperous happinesse in this world, and a triumphant and a glorious happinesse in the Worketo come.

Your vnfained, and much affectionate friend,

John Enans.
